PROFILE

Senior Web Developer and Tech Lead with over 10 years of experience, highly skilled in end-to-end SDLC and and possess an unwavering commitment to excellence.

With a Bachelor's degree in Information Technology and certifications in Scrum Mastery and Product Ownership from scrum.org, I bring a strong academic and practical foundation to my work.

Have a proven track record of collaboration with cross-functional teams to develop complex SaaS applications, cloud infrastructures, and intricate integrations.

My entrepreneurial mindset, meticulous attention to detail, and strategic application of technology drive my passion for delivering innovative solutions.

EXPERIENCE

Lead Developer | Qewam   Jul 2021 - Present

Headed the development of Qewam's iPaaS platform and its SaaS products, collaborating closely with cross-functional teams to launch new features.

- Led backend development, ensuring high performance and scalability by implementing best practices in coding standards, security measures, and system architecture.
- Successfully launched multiple SaaS products, enhancing operational efficiency and user engagement.

Tech Consultant, Full stack Developer | Freelance   Aug 2014 - Present

Working with a selected freelance client base providing strategic guidance and consultations. Building web apps, setting up tech businesses.

Senior Full stack Developer | Motaweron   Jul 2019 - Aug 2020

Created multiple web applications, participating in the whole process of their development: product design, development, launch, and maintenance.

- Collaborated with the team to build a powerful SaaS application that offers International express deliveries, and other logistic services utilizing and consuming the DHL API various services.
- Built a CRM System which eventually was adopted by the company as their system of choice for managing support tickets.

Senior Backend Developer | Crown Tech   Jan 2019 - Jul 2019

- Constructed a comprehensive CMS based system to effectively track, manage, and organize their records, activities, events, and occasions replacing their old unmaintained system.
- Collaborated with other developers building a travel agency and hotel management application serving both end-customers and staff.
